J. Jeffrey Huber Daily Report

10-25-2020

River Activities – Electron is going to divert the Puyallup river.

Construction Activities – Electron crew is diverting the Puyallup River.

JH – 0630 Tara L. from Fish & Wildlife on deck for the river diversion.

JH – 0700 Corey K. from Electron conducts the water quality tests. These will be ongoing throughout the day.

JH – Electron crew member 300' downstream to monitor for turbidity.

JH – 0730 Electron crew begins using excavators to demo existing bank holding back river.

JH – 0830 Planning meeting held with myself, Sean M, Corey K, & Thom F. No issues.

JH – 0900 River is communicating at the West bank removal. No issues.

JH – 0900 Five-person Electron crew along with Mallory the fish biologist from Electron and Tara with F&W on the North side of the river to assist with the diversion.

JH – 0915 Walked the existing West bank and looked for turbidity and communication. No issues.

JH – 1100 Electron fish monitors are in place on both sides of the river bank to monitor for any distressed fish. No issues.

JH – 1115 South Channel is “officially” opened. Fish monitors in place. No issues.

JH – 1120 Electron crew starts backfilling to cut off the North bank and direction towards the new spillway and channel. No fish have been seen. There is turbidity as to be expected. No issues.

JH – 1130 Water is building at the cutoff wall. No issues.

JH – 1215 Water is spilling over the cutoff wall.

PO Box 1150
